Dear sir or madam

I am writing to you because I want to know if you use palm oil in a sustainable way or not. Can you make sure that you plant palm trees in a empty space? I am worried about how many orangutans have died from people cutting down the trees and not replanting them! Why can't you think about the planet first? The animals are more important than palm oil! I would love to hear from you

Yours Faithfully

Sophia

to see how you make palm oil. I  
want to see if you make it  
in a good or bad way because I  
don't want orangutans to become  
extinct. >
