

We Wonder: Mission to Mars

Design a place to live on Mars

Use this sheet to design your Martian home or 'hab'.

When designing your hab, think about:

- What will your role on Mars be and how will you contribute?
- What equipment will you need to survive the hostile environment?
- How can you make your hab sustainable and eco-friendly?
- What will you do for fun and relaxation?
- What will your hab look like?
- Make sure you demonstrate the reading and research you have done by labelling your drawing clearly.

What will your role be on Mars? What will be the best thing and the hardest thing about living on Mars?

Sketches, notes and ideas for your hab here:

Do a more technical drawing of your hab here, and label the key features such as different rooms, important equipment areas, fun spaces.

Please use a ruler and a pencil so that you can be as neat and precise as possible.
